

# Riccardo Bragaglia

## IT Engineer

### Academic training

Università degli studi di Roma La Sapienza

Master's degree Cybersecurity (96/110)  
2021/2024

Università degli studi Roma 3

Bachelor degree IT Engineering (97/110)  
2018/2021

### Learning and formative experiences

**Cybersecurity Master's thesis: "Malware detection system based on image and graph classification" - 2024**

I worked with the university to study an alternative way of representing executables to see if automated detection could benefit from it, developing my master's thesis.

**"Cyber Threat Intelligence (CTI), From Zero to Hero" by Nino Verde, and other seminars hosted in Sapienza - 2023**

Here I've learned what CTI is and what a career in cybersecurity actually looks like.

**Practical Network Defense and Ethical Hacking, security and sandbox simulation project - 2022**

During the project I've learned how to work in group on a multi-layer cybersecurity challenge

**Malware analysis course - 2022**

Personally the course that I've found most interest in, teaching me about various basic malware characteristics and analysis procedures

**Ireland cultural 2-weeks exchange in Dublin - 2017**

I lived two weeks with an Irish family refining my english both speaking and listening
